

Project Demonstration

Open Website

Navigate Dashboard

Open Story

Apply Filters

View Charts

Analyze Results

Step	Demonstration Activity	What to Explain
1	Open Flask Web Application	Launch the application on localhost and explain the home page.
2	View KPI Dashboard	Show Total Patients, Average BMI, Heart Disease Cases, and other KPI cards.
3	Demographic Analysis	Explain age groups, gender distribution, and disease prevalence.
4	Lifestyle Risk Analysis	Demonstrate smoking, alcohol consumption, physical activity, and general health charts.
5	Co-morbidity Analysis	Show Diabetes, Stroke, Kidney Disease, Asthma, and Skin Cancer relationships.
6	Metabolic Risk Analysis	Explain BMI Tree Map and obesity-related heart disease risk.
7	Epidemiological Analysis	Present race-wise distribution and percentages of heart disease.
8	Apply Interactive Filters	Filter by age, gender, race, diabetes, smoking, BMI, etc., and show how all charts update dynamically.
9	Open Tableau Story	Walk through the Tableau Story and explain the sequence of insights.

Step	Demonstration Activity	What to Explain
10	Final Insights & Conclusion	Summarize the key findings and explain how the dashboard supports healthcare professionals in decision-making.
